Amendments to the Claims

Claims 1-18 (Canceled)

Claim 19 (Previously presented): A method for providing a scheduler object comprising:

determining a start time of a simultaneous event, the simultaneous event to include a plurality of client apparatuses;

receiving a request prior to the start time from a client apparatus to take part in the simultaneous event; and

sending a command to the client apparatus in response to receiving the request from the client apparatus if the request is received during a predetermined threshold period, wherein the command relates to starting the simultaneous event on the client apparatus.

Claim 20 (Previously presented): A method of claim 19 further comprising determining a current time.

Claim 21 (Previously presented): A method of claim 20 wherein the command includes chapter information.

Claim 22 (Previously presented): A method of claim 19 wherein the starting of the simultaneous event on the client apparatus includes starting playback of local content stored at the client apparatus.

Claim 23 (Previously presented): A method of claim 22 wherein the local content is stored on a DVD.

Claim 24 (Previously presented): A method of claim 23 wherein the command is a DVD command.

Amendment B
S.N. 09/488,614
Page 3

Claim 25 (Previously presented): A method of claim 24 wherein the DVD command is based upon a decoder of the client apparatus.

Claim 26 (Previously presented): A method of claim 19 further comprising determining a second command for sending to the client apparatus.

Claim 27 (Previously presented): A method of claim 26 further comprising:

determining a time for the second command to be sent to the client apparatus; and
style="padding-left: 80px;">sending the second command to the client apparatus.

Claim 28 (New): A method of claim 27 wherein the second command includes chapter information.

Claim 29 (Previously presented): A method of claim 27 wherein the starting of the simultaneous event on the client apparatus includes starting playback of local content stored at the client apparatus.

Claim 30 (Previously presented): A method of claim 29 wherein the local content is stored on a DVD.

Claim 31 (Previously presented): A method of claim 30 wherein the second command is a DVD command.

Claim 32 (Previously presented): A method of claim 26 further comprising sending the second command based upon a lapsed time of the event.
